## ABSTRACT OF THE DISCLOSURE

Improved duplicate and near-duplicate detection
techniques may assign a number of fingerprints to a given
5    document by (i) extracting parts from the document, (ii)
assigning the extracted parts to one or more of a
predetermined number of lists, and (iii) generating a
fingerprint from each of the populated lists.  Two
documents may be considered to be near-duplicates if any
10   one of their fingerprints match.
